

Agile Practitioner Certificate

This certificate program is designed for core Agile team members: project managers, business analysts, product owners, ScrumMasters, project coaches, and software developers. All participants take either Agile/Scrum Crash Course or Agile Business Analysis, plus Influencing Without Authority and one elective option. Develop the skills required to be successful in an Agile environment.

"This was by far the best continuing education experience I have been exposed to in a very long time. The instructor was very knowledgeable about the subject matter as well as passionate about teaching it to others. Both of these elements made for an extremely informative as well as enjoyable experience. Thank you for such a wonderful learning experience. This makes bragging about Watermark Learning a no-brainer!"
 —Corinne Meshbesh, ScrumMaster student
